

ANIFILM 2020

Mezinárodní festival animovaných filmů / 6. – 11. října 2020 / Liberec / Česká republika

HYGIENIC-EPIDEMIOLOGIC PLAN

This hygienic-epidemiologic plan is based on the measures and regulations adopted by the Czech Government, valid from Monday 5 October 2020.

Organisational Measures

With regards to the current situation, we fully realise the risk ensuing from the ongoing COVID-19 epidemic. This year's edition of Anifilm International Festival of Animated Films will therefore adhere to strict safety and hygienic measures aimed to prevent the spread of the SARS-CoV-2 virus.

To access the festival places, each visitor must have a valid festival pass. With the exception of the open-air screening at the Dr. E. Beneš square, the festival will for safety reasons organise no freely accessible events this year. The organisers will create a database of contacts of all festival visitors which will help in their tracking if necessary.

Safety Measures

With regards to the current regulations, the festival organisers will secure:

1. Wearing face masks in all indoor premises
2. Maximum number of 500 people at film and other artistic performances
3. Maximum number of 10 people at other non-screening events in the indoor premises

The organisers will carefully observe the situation and will include any changes in safety measures announced by the Ministry of Health of the Czech Republic or the Regional Hygiene Station in Liberec into the plan.

Festival Places Capacity

Anifilm staff will be stationed at every festival place and will allow entry only to visitors with valid festival passes. The capacity of screening places will be adjusted to secure sufficient distances. Social distancing will be enforced and observed.

Inter Hostel Liberec	Cidlinská 138/2, 460 15 Liberec
Domov mládeže Liberec	Zeyerova 689/33, 460 01 Liberec

Hygienic Measures

The organisers will secure regular cleaning of festival places in collaboration with a cleaning service. With regards to the current situation and the risks connected to the SARS-CoV-2 epidemic, the frequency of cleaning will be significantly increased. Cleaning of individual screening places including disinfecting handles, rails and other exposed surfaces will take place after each screening.

At every festival place, there will be a contactless stand with biocidal agents which the visitors can use to sanitise their hands. There will also be disposable face masks and gloves.

There will also be distinctly marked litter bins for disposable face masks and gloves. This waste will be disposed of in accordance with strict hygienic measures.

Information Measures

All festival places and accommodations will have special notice boards with the most important information and rules regarding safety measures helping to prevent the spread of COVID-19:

- Recommendations how to minimise the risk of contracting SARS-CoV-2
- Recommendations regarding personal hygiene
- Recommendations regarding safety measures
- Recommendations regarding social distancing
- Information about the requirement to wear face masks
- Recommendations how to proceed in case of health problems

Anifilm staff at the screening places will remind the visitors that entry without a face mask is prohibited.

In Case of Infection

In case there is a suspicion of a COVID-19 infection, the organisers will immediately contact the Regional Hygiene Station in Liberec. If necessary, the organisers can provide an assigned space with bathroom and drinking water to the infected person. These premises will be thoroughly cleaned and sanitised.

The whole festival team is ready to ensure a smooth and safe festival and observe every hygienic and safety measure in collaboration with the city of Liberec and the Liberec Region.
